

# Meistream Plus

**Bulk water meters with GWFcoder® register  
for cold water up to 50°C  
DN 50, 65, 80, 100, 150**

## Our strength: Your benefit

- Measurement of low flow rates:  
**Increased cost effectiveness**
- Removable measuring insert:  
**Retrofittability and replaceability guaranteed**
- One measuring insert for various bodies:  
**Lower storage costs**
- Transfer of the effective meter reading:  
**No data loss and guaranteed security of the billing data**
- No programming required when commissioning the meter in a readout system (Plug & Play)  
**Easy and fast on-site installation**

## Application

- Measurement of medium to high flow rates
- Measurement of low flow rates during offpeak periods
- Automated mobile or fixed network readout of relevant billing data
- Wired or radio remote readout of hard to access metering installations, e.g. meter pits, reservoirs
- Measuring of
  - Desalinated / demineralized water
  - Caustic soda up to 20%
  - Saline water up to 10%
  - Chlorinated water up to 1%
  - Glycol-water solutions up to 30%
  - Caustic solutions up to pH value 9

## Features

- Horizontal installation position
- No straight flow section required before the meter
- Register can be turned through 355°
- Maximum operating pressure PN 16 bar
- Temperatures up to 50°C
- Rotor is hydrodynamically, radially, and axially balanced
- Available in the standard installation lengths for WS and WP meters
- Powder coating provides optimum corrosion protection
- Non-ferrous metal design
- SVGW certification
- CE Conformity according to the European Measuring Instrument Directive (MID)
- Flood-proof standard GWFcoder® register (IP68) with IEC interface, 5m cable and provision for a HRI pulser

## Options

- Flood-proof GWFcoder® register (IP68) with M-Bus interface, 5m cable and provision for a HRI pulser
- High-resolution pulse generator HRI
  - Documentation: HRI - EPe10213

# Technical Data

| Nominal diameter <sup>1)</sup>   | DN             | mm                | 50   | 50   | 65   | 65   | 80   | 80   | 100 | 100 | 150  |

## Dimension Diagram

## Materials

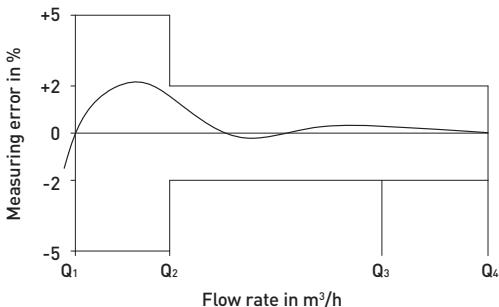

**Body:** Cast iron

**Measuring insert:** Plastic

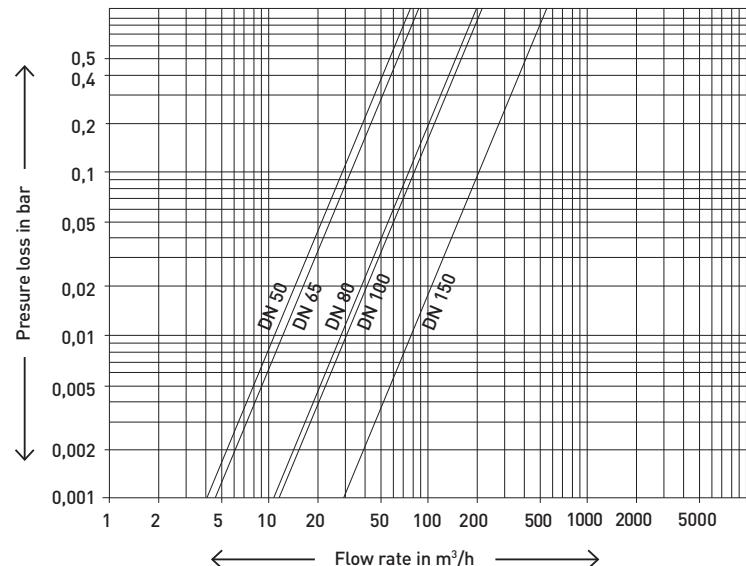

**Rotor:** Plastic

**Other materials:** Brass / non-rusting steel

## Measurement error curve

## Typical Head Loss Curve

## Installation

Pipeline: horizontal —  
Meter head: upwards ↑

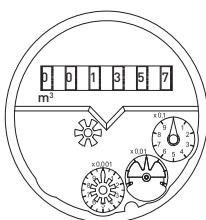

## Commission

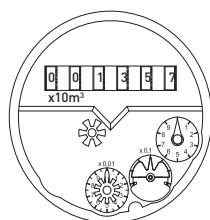

When commissioning the meter the measuring section must be filled slowly (bleed slowly).

## Dial

DN 50 – DN 100

DN 150

## GWFCoder®-Technology

In the GWFCoder® system, the individual rollers of the mechanical register are read out optoelectronically. The position of the various long asymmetrically arranged slits in the roller counters is scanned using 5 light barriers (light-pipe transmitter and receiver). The light barriers are implemented with phototransistors. LEDs, and light conductors, which are all consecutively scanned and evaluated. The precisely defined position of each individual roller counter is encoded as an absolute roller counter reading and read out as a part of the protocol via the GWFCoder® interface. This functioning principle is patented by GWF. The GWFCoder® interface, compared to a meter with a pulse output, has an incomparably higher level of information content and readout accuracy. A GWFCoder® register does not require a battery, which, in turn, does not compromise existing revision cycles. The readout device supplies the power for the readout.

## GWFCoder®- Data package IEC

|                         |                      |
|-------------------------|----------------------|
| Medium:                 | Water/gas            |
| Absolute meter reading: | 123654m <sup>3</sup> |
| Serial number:          | 43215678             |
| Meter production date:  | 29-12-06             |
| Meter size:             | DN15 / G4            |

## Standards and interface

GWFCoder®-registeres can be implemented with all common standardized or interface definitions. The GWFCoder® system currently supports the following interfaces:

### Interface

|          |  |
|----------|--|
| SCR/IEC: | IEC 62056-21 Mode A (IEC 1107)             |
| M-Bus:   | EN 13757-2/3                               |
| Namur:   | EN 60947-5-6 (large-scale gas measurement) |

## Example of use

### Wireless readout

Meter with GWFCoder® register and IEC interface is read out by radio using a mobile infrastructure.
